[Telegrams.]

Precautions at Matamoras against yellow fever in Mexico.

BROWNSVILLE, TEX., August 3, 1903.

SECRETARY OF STATE, *Washington:*

Yellow Tampico; no precautions being taken at Matamoras opposite Brownsville, Tex.

GRIFFITH,

U. S. Consul at Matamoras.

AUGUST 4, 1903.

Acting Assistant Surgeon COMBE,

Brownsville, Tex.:

Yellow fever reported Tampico and other places in Mexico. No precautions taken at Matamoras. Wire what precautions you deem necessary at Brownsville.

WYMAN.

BROWNSVILLE, TEX., August 7, 1903.

SURGEON-GENERAL, *Washington:*

In company with American consul interviewed Mexican authorities to-day. They gave us assurances that they would immediately establish observation stations at San Miguel and San Fernando on the only avenues of entrance into Matamoras. No yellow fever along the Rio Grande. Will wire any developments here.

COMBE.

Texas State quarantine against San Luis Potosi removed.

AUSTIN, TEX., August 9, 1903.

SURGEON-GENERAL, *Washington:*

After thorough investigation I fail to find yellow fever in San Luis Potosi. Have removed Texas quarantine against that place. All actually infected places in Mexico will be rigidly quarantined; have detailed special inspector at San Luis Potosi. Every precaution will be taken by Texas authorities. Rigid inspection will be maintained

on frontier. Will advise you of any information this department gets and will appreciate similar courtesy from you.

TABOR,
State Health Officer of Texas.

Case of yellow fever reported at San Luis Potosi imported from Ciudad de Valles.

The following is received from Acting Assistant Surgeon Hamilton:

SAN LUIS POTOSI, MEXICO, August 4, 1903.

STATE HEALTH OFFICER OF TEXAS.

There have not been any cases of yellow fever in San Luis Potosi for years, except the case of a Government medical expert who was sent to investigate yellow fever at Ciudad de Valles. He contracted the disease, came to San Luis Potosi, and died July 28, 1903.

Every possible precaution has been taken to prevent spread since the occurrence of that case. There has never been yellow fever in San Luis Potosi, except in the case of persons who contracted the disease elsewhere and came here infected, and no other persons have been infected by those cases, even those coming in daily contact with the cases.

S. E. CROSS,
U. S. Consular Agent.

[Reports to the Surgeon-General Public Health and Marine-Hospital Service.]

Summary of work in Chinatown, San Francisco, for week ended August 1, 1903.

AUSTRALIA.

Plague in Queensland.

BUBONIC PLAGUE.

Bulletin for the week ended 12 o'clock noon Saturday, June 6, 1903.

On the 1st instant the health officer at Bundaberg, who performed a post-mortem examination on the body of the man who died of plague at Bundaberg on May 20 ultimo, was reported to be suffering from plague. It has since been reported that his condition is satisfactory.

BRISBANE.

Admitted to hospital during the week	0
Died during week	0
Discharged during week	1
Remaining under treatment	4
Total deaths, Brisbane	9
Total cases to date:	
Brisbane	19
Bundaberg	2
Rockhampton	2
Townsville	3
Date of last case:	
Bundaberg (under treatment)	June 1, 1903
Rockhampton (died)	Feb. 21, 1903
Townsville (discharged)	Dec. 24, 1902

Contacts have been kept under supervision and no case has arisen amongst them.

RATS.

Number of rats examined at the bacteriological institute during week	169
Number found to be infected	5

Fifteen mice were also examined and were found to be free from infection.

Bulletin for the week ended 12 o'clock noon, Saturday, June 13, 1903.

BRISBANE.

Admitted to hospital during the week	0
Died during week	0
Discharged during week	4
Remaining under treatment	0
Total deaths, Brisbane	9
Total cases to date:	
Brisbane	19
Bundaberg	3
Rockhampton	2
Townsville	3

Date of last case at Bundaberg (discharged), June 13, 1903; at Rockhampton (died), February 21, 1903; at Townsville (discharged), December 24, 1902.

Contacts have been kept under supervision, and no case has arisen among them.

RATS.

Number of rats examined at the bacteriological institute during the week 246
Number found to be infected..... 1

NOTICE.—There are now no cases of plague under treatment or suspected cases under observation in the State of Queensland.

The plague hospital at Brisbane will be closed to-day, June 13.

A large number of rats are being examined by the government bacteriologist every day, and but few are found infected. Should no further developments occur this bulletin will be discontinued from this date.

B. BURNETT HAM,
Commissioner of Public Health.

BRAZIL.

Reports from Bahia—Mortuary statistics.

Consul Furniss reports, July 13, as follows: During the week ended July 11, 1903, 86 bodies were interred in the Bahia cemeteries. The causes of death were as follows: Alcoholism 1, aneurism 2, arteriosclerosis 2, ascites 1, beriberi 6, bronchitis 7, cerebral congestion 3, cirrhosis of liver 1, diabetes 1, aortic dilatation 1, dysentery 2, umbilical hemorrhage 2, hepatitis 1, influenza 1, meningitis 2, death by violence 2, nephritis 2, stillborn 3, pneumonia 1, tetanus neonatorum 3, pulmonary tuberculosis 8, organic diseases of heart 5, malarial fevers 3, diarrhea and enteritis 8, senile debility 3, other causes 15.

BRITISH HONDURAS.

Report from Belize, fruit port.

Acting Assistant Surgeon Carson reports as follows: Week ended July 26, 1903. Present officially estimated population, 8,500; no deaths; prevailing disease, mild type of malarial fever; general sanitary condition of this port and the surrounding country during the week, very good.

Bills of health were issued to the following-named vessels:

Date.	Name of vessel.	Number of crew.	Number of passengers from this port.	Number of passengers in transit.	Pieces of baggage disinfected.
July 21	Dagbjorg	16	0	0	0
23	David	17	0	0	0
24	Breakwater	34	9	21	23

CANADA.

Inspection of immigrants at Quebec.

Assistant Surgeon Billings reports, August 6, as follows:

Week ended July 25, 1903. Number of immigrants inspected, 676; passed, 650; detained, 26.

Week ended August 1, 1903. Number of immigrants inspected, 406; passed, 382; detained, 24.

Month of July, 1903. Number of immigrants inspected, 2,163; number passed, 2,083; number rejected, 80.

CHINA.

Report from Hongkong—Plague—Decline in number of plague cases—Examination of rats.

Passed Assistant Surgeon McMullen reports, June 26, as follows: During the week ended June 20, 1903, 10 vessels, with an aggregate personnel of 899 crew and 625 passengers (283 cabin and 342 steerage), were inspected and given bills of health. Six hundred and thirty-nine crew and 308 steerage passengers were bathed and their clothing disinfecting. There were 63 rejections. Fifty-two cases of plague, 31 in the city and 21 in adjacent districts, were reported for this period, with 47 deaths, making a total of 1,222 cases since January 1. The daily report of plague cases shows a marked decrease in the past few days, and a further decline of this disease may now be looked for, since the history of previous years shows a decrease at this season of the year. The only other communicable diseases reported for this week were 2 cases of cholera (Chinese), with no deaths, a total of only 5 cases since January 1.

The report of the Government bacteriologist for 1902 shows that 117,839 rats were examined, and of these 2,015 were found to be infected with plague.

COLOMBIA.

Report from Bocas del Toro, fruit port—Smallpox—Vaccination.

Acting Assistant Surgeon Osterhout reports as follows: Week ended July 28, 1903. Present officially estimated population not obtainable; one case of smallpox during the week, no deaths; number of deaths from other causes, 2; prevailing diseases, malarial affections and smallpox. General sanitary condition of this port and the surrounding country during the week, not good. A few cases of smallpox have developed in the villages in the surrounding lagoons. Fourteen cases remain under treatment in the isolation hospital in this town. Vaccination continues; the seventh thousand points are now being used.

Bills of health were issued to the following-named vessels:

Date.	Name of vessel.	Number of crew.	Number of passengers from this port.	Number of passengers in transit.	Pieces of baggage disinfected.
July 22	Taunton.....	25	0	0	0
22	Fort Morgan.....	23	0	0	0
25	Mount Vernon.....	21	0	0	0

COSTA RICA.

Report from Limon, fruit port—Yellow fever.

Acting Assistant Surgeon Gruver reports as follows: Week ended July 30, 1903. Census population, 4,000; number of cases of yellow fever, 2—deaths, 2; number of deaths from other causes, 4; prevailing diseases, yellow fever and hemoglobinuric fever. This latter disease, called here "black-water" fever, is, I understand, increasing in the interior. General sanitary condition of this port and the surrounding country during the week, very poor. The mortality from yellow fever this month is very high—about 59 per cent. Many of the cases have been discovered in various parts of the city just prior to death. New foci of infection are established and no adequate measures taken to prevent the spread of this disease. One case reported above occurred at the Grand Hotel, recently reopened.

It is a significant fact that no case of yellow fever has been reported from the cuartel, or jail, which previously furnished many cases, since ten days after the sleeping quarters were fumigated and made mosquito proof.

I have no means of ascertaining the exact number of cases which occur in Limon, and can form an estimate only by the cases and deaths which I know to occur.

Bills of health were issued to the following-named vessels:

Date.	Name of vessel.	Number of crew.	Number of passengers from this port.	Number of passengers in transit.	Pieces of baggage disinfected.
July 24	Hispania	22	0	0	0
24	Margherita	28	0	6	0
26	Venus	24	0	0	0
27	Adirondack	44	2	8	0
29	Preston	32	0	0	0
30	Alabama	18	0	0	0

CUBA.

Sanitary conditions.

The following is received from Minister Squiers, under date of August 1:

Sanitary conditions in the island are satisfactory with the exception of the failure of the Senate to pass the bill authorizing an expenditure of \$200,000 for a much-needed system of waterworks at Santiago. I am advised, however, that a way will be found to commence work immediately.

In spite of the stringent quarantine regulations a yellow-fever case slipped into the city from Mexico (Progreso) as an immune. The case was soon discovered and sent to quarantine. Every precaution was taken to destroy all possibly infected mosquitoes, and the places the man was known to have frequented were thoroughly fumigated. No one has been infected, as I am informed by Dr. Finlay. The Government was very energetic and has most serious views of the question of quarantine and sanitation.

*Report from Cienfuegos—Inspection of vessels—Mortality statistics—
Sanitary conditions good.*

Acting Assistant Surgeon McMahon reports, August 4, as follows:
Week ended August 1, 1903. Four bills of health issued to vessels going to ports in the United States. All in good sanitary condition and no sickness.

Mortuary report for the week: Tuberculosis, 2; meningitis, 1; tetanus, infantile, 1; malaria, 1; enteritis, 1; entero-colitis, 1; other causes, 6; total, 13.

Good rains are falling here almost every day now, and the sanitary condition of the city is fairly good.

Report for the months of May, June, and July, 1903.

Month.	Bills of health issued.	Ships inspected.	Crews inspected.	Passengers inspected.	Deaths.
May	16	16	460	8	72
June	17	17	536	1	75
July	19	19	555	11	67

Mortuary report for Cienfuegos for May, June, and July for the years 1900-1903.

Year.	May.	June.	July.
1900	81	83	80
1901	87	87	80
1902	61	61	78
1903	72	75	67

No quarantinable disease has entered this port during these months and none has been reported in the city.

Report from Habana—Inspection of vessels—Mortality statistics.

Assistant Surgeon Trotter, in temporary charge, reports, July 30, as follows:

Week ended July 25, 1903.

Number of health certificates issued	85
Vessels inspected and issued bills of health	14
Crews of outgoing vessels inspected	638
Passengers of outgoing vessels inspected	248
Pieces of baggage inspected	112
Pieces of freight inspected	1,874
Pieces of express inspected	14
Pieces of baggage disinfected	5

Mortuary report of Habana, Cuba, for week ended July 25, 1903.

Disease.	Number of deaths.	Disease.	Number of deaths.
Tuberculosis	20	Scarlet fever	1
Pneumonia	2	Diphtheria	1
Bronchitis	2	Malarial fever	2
Broncho-pneumonia	1	Cancer	4
Enteric fever	3	Total from all causes	117
Enteritis	3		
Meningitis	20		

Immune certificates from Mexico abolished.

Assistant Surgeon Trotter reports, August 3, as follows: Confirming my cablegram of this date, "Dr. Finlay has abolished immune certificates from Mexican ports," I have the honor to report that no more immune certificates will be issued to passengers bound from Mexican ports to Cuba, Dr. Finlay having abolished this practice. On arrival of vessels at this port the boarding officer may, on his own responsibility, allow those persons to land whom he knows are immunes to yellow fever. A record will be taken in each case by him and sent to the superior sanitary board for file.

Dr. Finlay has established an immune bureau of the sanitary department, where records of immunity will be kept and certificates may be obtained by immune passengers desiring to go to Mexico and return. Since the case of the nonimmune passenger who landed from the *Vigilancia* on the 7th of July on a false immune certificate the Cuban authorities have been exceedingly watchful. With the abolishment of the certificates from Mexico there is almost no possibility of a nonimmune entering Cuba from Mexico within five days. The boarding officers are not likely to pass any persons except those positively known to be immune, for it is done on their own responsibility, and a mistake means the loss of their positions.

Report from Matanzas—Mortality statistics.

Passed Assistant Surgeon von Ezdorf reports, August 3, as follows: During the week ended August 1, 1903, four bills of health were issued to vessels prior to sailing for ports in the United States.

Fourteen deaths were reported in this city for the period covered by this report, making an annual rate of mortality for the week of 15.16 per 1,000.

The causes of death reported were as follows: Pellagra 1, tuberculosis 6, cancer 1, meningitis 1, enteritis 1, eclampsia 1, pemphigus 1, fracture (vertebral) 1, senile debility 1.

No quarantinable disease was reported in this district.

*Report from Santiago—Inspection of vessels—Mortality statistics—
Water supply inadequate.*

Acting Assistant Surgeon Wilson reports, July 28, as follows: Week ended July 25, 1903. Bills of health issued to four vessels bound for the United States and Porto Rico.

No quarantinable disease has been reported.

A fire that broke out at midnight one day last week brought out the fact that the water is turned off from the lower part of the city at night, so that it will supply the higher parts. This proves that the quantity of water at present is inadequate.

Mortality statistics for the week ended July 25, 1903.

Causes of death.	Number.
Pernicious fever.....	1
Tubercle of lungs.....	4
Tubercle of abdomen.....	1
Cerebral hemorrhage.....	2
Tetanus, infantile.....	1
Organic heart disease.....	1
Cardio-vascular sclerosis.....	1
Broncho-pneumonia.....	1
Diarrhea and enteritis (under 2 years).....	9
Diarrhea and enteritis (chronic).....	1
Diarrhea and enteritis (2 years and over).....	2
Ill-defined or unspecified.....	3
Total.....	27

Annual rate of mortality for the week, 32.65 per 1,000; estimated population, 43,000.

GERMANY.

Report from Berlin—Plague and cholera in various countries.

Consul-General Mason reports, July 25, as follows:

Plague.

Turkey.—In Djebelil, about 30 kilometers from Beirut, there occurred on the 4th of July 3 cases of plague (2 deaths).

Egypt.—In Alexandria, on the 5th of July, 1 death from plague was registered. In Tintah on the 9th of July there were registered 4 cases of plague.

British India.—In the Bombay Presidency during the two weeks ended June 27 there were registered 952+1,215 cases of plague and 704+786 deaths. In the city of Bombay there occurred during the three weeks from the 7th to the 27th of June 237, 138, and 100 plague cases, and 226, 122, and 91 deaths. In the town and port of Karachi 17, 9, and 4 cases; with 15, 8, and 3 deaths, respectively. In the Belgaum district for the same three weeks 227, 294, 412 cases, and 149 213, 248 deaths; in the Dharwar district 70, 167, 195 cases, with 44, 107, 121 deaths.

Plague and cholera.

British India.—In Calcutta during the week ended June 13 there occurred 15 deaths from plague and 45 deaths from cholera.

Death rate of Berlin.

The death rate of Berlin for the week ended July 11 was higher than in any of the foregoing four weeks. It amounted, calculated on the year, to 14.5 per thousand, which was also slightly higher than the rate for the corresponding week of last year, in which it amounted to 14.2. Of the large German cities more than two-thirds showed less favorable figures than Berlin. The following towns, among others, had a considerably higher death rate than Berlin, namely, Munich, Leipzig, Hamburg, Bremen, Hanover, Dusseldorf, Frankfort-on-the-Main, Breslau, as well as Paris and Vienna, while the death rate of the following places was higher yet, viz, Nuremberg, Karlsruhe, Cologne,

Magdeburg, Halle, Königsberg, Stettin, and Posen. On the other hand, the following cities had a lower death rate than Berlin, namely, Cassel, Altona, Schöneberg (with 11 per thousand), Charlottenburg (with 10.7 per thousand), and London. The participation of children in the first year of life in the mortality showed a decrease as compared with the foregoing week, the increase in the number of deaths being confined to the higher age classes. The rate of mortality among infants reached 4.2 per thousand per year, only about half of that of Munich, Nuremberg, Leipzig, and one-fifth of the rate of Stettin and Posen. Acute diseases of the respiratory organs showed a decrease as compared with the foregoing week, causing 36 deaths. On the other hand, there was a heavy increase noticeable with acute intestinal diseases, which claimed 100 victims. There were further registered 68 deaths from phthisis pulmonalis and 42 deaths from cancer. Five persons died of scarlet fever, 4 of diphtheria, and 6 of measles. Thirteen persons died by violence.

GUATEMALA.

Report from Livingston, fruit port.

Acting Assistant Surgeon Peters reports as follows: Week ended July 27, 1903. Present officially estimated population, 3,500; no deaths; prevailing diseases, malarial; general sanitary condition of this port and the surrounding country during the week, good.

Bills of health were issued to the following-named vessels:

Date.	Name of vessel.	Number of crew.	Number of passengers from this port.	Number of passengers in transit.	Pieces of baggage disinfected.

PLAGUE AT PORT SAID.

A dispatch dated July 13, 1903, states that 7 new cases of bubonic plague have been declared at Port Said. The disease is on the increase.

PLAGUE AT MAURITIUS.

A telegram from the governor of Mauritius states that during the week ended July 9, 1903, there were 8 cases of bubonic plague on the island, all of which were fatal.

CASE OF SUSPECTED PLAGUE ON STEAMSHIP EGYPT AT SUEZ.

There was landed at Suez July 3, 1903, a case of suspected bubonic plague from the P. and O. steamer *Egypt*. The patient's clothes were burned, and the steamer, after disinfection, proceeded to Plymouth, where she arrived without further developments, and after inspection was given pratique.

QUARANTINE RAISED.

Information from Lima, under date of July 11, 1903, states that the Peruvian Government has revoked a decree refusing, owing to bubonic plague, admittance to vessels from Chile.

Week ended July 25, 1903.

PLAGUE IN MAURITIUS.

A telegram from the governor of Mauritius states that during the week ended July 16, 1903, there were 3 cases of plague on the island, 2 of which were fatal.

MEXICO.

Reports from Progreso—Inspection of vessels—Mortality and sanitary conditions in Progreso and Merida.

Acting Assistant Surgeon Harrison reports, July 26 and August 2, as follows:

Week ended July 26, 1903. Bills of health issued:

July 19, steamship *Havana*, American, to New York, via Habana. Water, about 2 miles out. Crew, 95 (good). Passengers, as follows: Vera Cruz to Progreso, 90 reported (good); Progreso to New York, 3

(good); Progreso to Habana, 26 reported (good); Transit, to New York, 37 reported (good); to Habana, 26 reported (good).

July 20, *Wm. Cliff*, British, to New Orleans. Water, about 2 miles. Crew, 45. Inspected (good).

July 20, steamship *Ravensdale*, British, to New York, via Campeche. Wharf. Crew, 20; 1 case, first engineer, cardiac or renal trouble; reported as sick soon after leaving New York; convalescent and free of fever at inspection.

July 21, steamship *Santiago de Cuba*, Cuban, to New York. Water, 2 miles. Crew, 28 (good).

July 21, steamship *Alm*, Norwegian, to Mobile. Wharf. Crew, 24; surgeon, Lacey; good, except cabin boy, Jamaican, with fever, diagnosed from history as malarial.

Progreso—Mortality.

Population about 8,000 resident, 400 or 500 transient. Sanitary condition of town and immediate surroundings not satisfactory. Yellow fever reported this week, 4 cases, 2 deaths. Two of the cases are still in the isolation hospital. Deaths from other causes, 9.

Merida—Mortality.

Six days—Deaths, 25 to 30, including 6 from yellow fever.

Week ended August 2, 1903, bills of health issued:

July 25, steamship *Senator*, British; Tampico, via Progreso, to New Orleans. Crew, 41 (good); water, 3 miles out; no mosquitoes.

July 26, steamship *Esperanza*, American; Vera Cruz, via Progreso and Habana, to New York; water, 3 or 4 miles out; no mosquitoes. Passengers: To Progreso, 54; Progreso to New York, 5; transit, 47; to Habana, 33; total, 94. Crew, sanitary (good).

July 28, steamship *Ulrican*, Norwegian; water, 2 miles out; no mosquitoes; crew, 26 (good); to Boston.

Progreso—Mortality.

Deaths: Yellow fever, 4. At this date there are probably 3 or 4 cases of yellow fever in Progreso. Other causes, 13.

Merida—Mortality.

In Merida deaths are estimated as follows: July 25 to 30, inclusive: Yellow fever, 6; other causes, 55, estimated.

Sanitary condition.

It is said that the sanitary condition of both Progreso and Merida has not been improved since my last report, but continues bad or only fairly good.

Report from Vera Cruz—Mortality statistics—Yellow fever on British steamship Cayo Largo, from Habana, via Tampico.

Assistant Surgeon Goldberger reports, July 27, as follows: During the week ended July 25, 1903, there was recorded a total of 60 deaths, of which 16 were due to yellow fever and 8 to tuberculosis.

The British steamer *Cayo Largo*, from Habana via Tampico, arrived here July 23 with the captain sick with yellow fever. He was taken sick almost exactly three and one-half days after reaching Tampico and eight hours before arriving here. The captain states that he spent the afternoon of the day of his arrival in Tampico at the house of his agent, where he took a nap—a peculiarly dangerous procedure, inasmuch as the *Stegomyia fasciata* are particularly active at just about that time of day.

PHILIPPINE ISLANDS.

Report from Manila—Cholera in Manila and the provinces—Danger of infection from Mariquina River—Cholera in Cebu—Quarantine.

Assistant Surgeon Heiser, chief quarantine officer for the Philippine Islands, reports, June 25, as follows:

In Manila there continues to be a continual decrease in the number of cases of cholera. The number has fallen from 66 to 9 per week.

Danger of infection from the Mariquina River.

During the week there has been grave apprehension felt owing to the fact that cholera has made its appearance at San Mateo, which is a village situated on the banks of the Mariquina River immediately above the point from which the water which supplies Manila is pumped into pipes. There have been altogether 9 cases and 7 deaths reported during the week covered by the report. The principal danger arises from the fact that the river is very low and the greater portion of the water is used to supply Manila. Soldiers have been placed on guard to prevent contamination of the river. The use of public latrines, where the disposal of the fecal matter can be controlled, has been made compulsory. Daily inspections and other sanitary measures have been instituted by the board of health.

The situation has improved so much at Manila that it is the intention to permit the United States army transport *Kilpatrick* to sail for New York without first undergoing quarantine detention. The passengers to embark on her have all been in Manila for one week or longer. Steerage passengers will be bathed and their entire personal effects disinfected by steam before final embarkation.

Cholera increasing in Cebu—Quarantine measures.

Assistant Surgeon Fox reports that the cholera situation in Cebu continues to grow worse. There have been 53 cases and 36 deaths during the week. Owing to the fact that Manila is practically free from cholera it was decided not to permit steerage passengers to enter this port until they have completed five days from the last possible exposure to infection. Crews of vessels have been forbidden to land at Cebu.

Cholera report, Manila, for week ended June 20, 1903, 9 cases, 8 deaths. Nationality, Filipino.

Report of cholera occurring in provincial towns in the Philippine Islands for the week ended June 20, 1903.

Inspection of immigrants at San Juan.

Passed Assistant Surgeon Lumsden, acting chief quarantine officer for Porto Rico, reports, July 27, as follows:

Report of alien passengers arriving at San Juan during the week ended July 25, 1903.

Date of arrival.	Vessel.	Where from.	Number of immigrants.
July 19	Cuban steamship Julia.....	Habana, Nuevitas, Puerto Padre, Gibara, Baracoa, Santiago, Santo Domingo, Macoris.	15
21	Spanish steamship Buenos Aires	Habana, Port Limon, Colon, Barranquilla, Curaçao, Puerto Cabello, La Guaira.	4
23	Danish schooner Annie E.....	St. Croix.....	1
	Total		20

Foreign and insular statistical reports of countries and cities—Yearly and monthly.

BRAZIL—Pernambuco.—Two weeks ended June 30, 1903. Estimated population, 200,000. Total number of deaths, 200, including diphtheria 1, enteric fever 3, smallpox 6, and 26 from tuberculosis.

BRITISH GUIANA—Demarara—Georgetown.—Month of June, 1903. Estimated population, 36,567. Total number of deaths, 217, including 29 from tuberculosis.

CANADA—Hamilton.—Month of July, 1903. Estimated population, 54,500. Total number of deaths, 73, including diphtheria 2, scarlet fever 1, and 2 from tuberculosis.

FRANCE—Rouen.—Month of June, 1903. Estimated population, 116,316. Total number of deaths, 280, including diphtheria 1, enteric fever 35, measles 10, scarlet fever 1, smallpox 2, and 48 from tuberculosis.

GREAT BRITAIN—England and Wales.—The deaths registered in 76 great towns in England and Wales during the week ended July 11, 1903, correspond to an annual rate of 13.7 per 1,000 of the aggregate population, which is estimated at 15,075,011.

London.—One thousand one hundred and seventy-six deaths were registered during the week, including measles 34, scarlet fever 9, diphtheria 10, whooping cough 19, enteric fever 6, and diarrhea 38. The deaths from all causes correspond to an annual rate of 13.3 per 1,000. In Greater London 1,583 deaths were registered. In the "outer ring" the deaths included 1 from diphtheria, 3 from measles, 2 from scarlet fever, and 4 from whooping cough.

Ireland.—The average annual death rate represented by the deaths registered during the week ended July 11, 1903, in the 21 principal town districts of Ireland was 17.8 per 1,000 of the population, which is estimated at 1,093,289. The lowest rate was recorded in Sligo,

viz, 4.8, and the highest in Clonmel, viz, 41.0 per 1,000. In Dublin and suburbs 138 deaths were registered, including whooping cough 1, and 31 from tuberculosis.

Scotland.—The deaths registered in 8 principal towns during the week ended July 11, 1903, correspond to an annual rate of 16.2 per 1,000 of the population, which is estimated at 1,702,912. The lowest mortality was recorded in Perth, viz, 10.8, and the highest in Greenock, viz, 23.3 per 1,000. The aggregate number of deaths registered from all causes was 531, including diphtheria 4, measles 13, scarlet fever 6, smallpox 1, and 18 from whooping cough.

JAMAICA—Port Antonio.—Two weeks ended June 25, 1903. Estimated population not reported. Number of deaths not reported. The health of the port is good.

JAPAN—Nagasaki.—Ten days ended July 10, 1903. Estimated population, 131,700. Total number of deaths not reported. Two deaths from diphtheria reported.

JAVA—Batavia.—Two weeks ended June 27, 1903. Estimated population, 150,000. Number of deaths not reported. No contagious diseases.

PHILIPPINE ISLANDS—Manila.—Month of March, 1903. Population, 302,154. Total number of deaths, 567, including enteric fever 6, whooping cough 1, cholera 6, plague 33, smallpox 3, and 58 from tuberculosis.

RUSSIA—Riga.—Month of May, 1903. Estimated population, 300,000. Total number of deaths, 560, including enteric fever 3, measles 15, scarlet fever 11, whooping cough 3, smallpox 24, and 65 from tuberculosis.

SPAIN—Barcelona.—Two weeks ended July 18, 1903. Estimated population, 600,000. Total number of deaths not reported. Three deaths from enteric fever and 6 from smallpox reported.

Corunna.—Month of June, 1903. Estimated population, 50,000. Total number of deaths, 83, including diphtheria 1, enteric fever 1, measles 2, whooping cough 1, and 16 from tuberculosis.

Cholera, yellow fever, plague, and smallpox, June 27, 1903, to August 14, 1903.

[Reports received by the Surgeon-General Public Health and Marine-Hospital Service from United States consuls through the Department of State and from other sources.]

[For reports received from December 27, 1902, to June 26, 1903, see PUBLIC HEALTH REPORTS for June 26, 1903.]
